

Connor D. Carr

(252) 617-8218 | cdcarr2001@gmail.com | [linkedin.com/in/cdcarr2001](https://www.linkedin.com/in/cdcarr2001)

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, Rust, SQL
Frameworks: React, Node.js, Django, JavaFX, Google Dialogflow
Developer Tools: Git, Docker, Google Cloud Platform, VS Code
Libraries: pandas, PyCryptodome, Java sockets

Professional Experience

Western Carolina University

June 2026 - Current

Software Developer

Cullowhee, NC

- Created visualization of user provided code through an interactable flowchart using TypeScript and React
- Evaluated functionality of existing code base and prioritized feature creation based on time and complexity
- Formulated and maintained documentation following standards for TypeScript documentation and in depth comments within components

Hobby Lobby

Aug 2026 – Current

Seasonal Employee

Greensboro, NC

- Quickly learned the expected workflow and applied it to ensure organizational requirements were met
- Assisted in a large variety of tasks where it was needed, adapting to requirements as they changed
- Provided feedback on customer thoughts about design and required components

Lowes Food

June 2024 – Aug. 2025

Grocery Stocker

Greensboro, NC

- Prioritized tasks in a high volume environment to ensure daily deadlines were met
- Collaborated with managers to determine daily goals
- Provided clear customer oriented information to resolve inquiries efficiently

Projects

Progranimate | TypeScript, React, MongoDB, Docker, Git

August 2025 – Current

- Built upon an existing code base from prior teams
- Re-implemented flowchart to improve performance and visuals
- Evaluated existing code and solved errors within

Dialogflow Chatbot | JavaScript, Google Cloud Platform, Google Dialogflow, PostgreSQL, Git

Nov. 2024 – Dec. 2024

- Developed a chatbot to answer questions about Western Carolina University's Computer Science program
- Utilized a Google Cloud Platform instance to run the chatbot online
- Determined intent training phrases in Google Dialogflow

Battleship | Java, Java Sockets, Git

Nov. 2024 – Dec. 2024

- Coded a command line interface client and server for a game of Battleship
- Utilized Java sockets to facilitate networked communication between clients and server
- Implemented Battleship game logic for server-side use

Securing Communication - Information Security | Python, PyCryptodome, Git

Nov. 2024

- Utilized PyCryptodome to generate RSA and AES keys, and create SHA-256 digests
- Applied RSA keys to encrypt/decrypt and sign/verify AES keys and AES keys to encrypt/decrypt data
- Leveraged SHA-256 digests to verify data has not been altered

Education

Western Carolina University

Cullowhee, NC

Bachelor of Science in Computer Science, Minor in Mathematics

Jan. 2023 – May 2026

Guilford Technical Community College

High Point, NC

Associate in Science

May 2021
